Building a Legacy of Educational Excellence

Dear Great Alumni,

As we all know by now, Birch Freeman High School is currently being rehabilitated. Thanks to the great leadership of the national executives. In order to complement the current project, on December 29, 2010, Bifoba, North American Chapter, embarked on a campaign titled: Building a Legacy of Educational Excellence. The first step of the campaign is to build 5000 watts of "Solar Power" at Birch Freeman High School, with an estimated cost of \$24, 328.32 (approximately \$25,000.00). All alumni across the globe are expected to join this laudable campaign.

Through our financial contributions, the alumni association will be able to offer supports in providing an excellent educational opportunity at Birch Freeman High School. This is one of several opportunities for us to give back to our "alma mater" and to support the vision and mission of the alumni association.

Now is our chance to make a lasting impact. As we are making our personal contributions, individual of us should start looking for corporations, foundations and friends of bifoba, all across the globe, who can contribute generously to this admirable and worthy project. Financial contributions can be made by personal checks, by cash in currency and through PayPal (on bifoba website) by debit cards, Visa and MasterCard, and American Express, also by money orders, bank drafts, banking money transfers, Western Union, and, of course, by sponsorships and pledges.

For those great alumni in Nigeria, please make contributions (gifts) to:
